

MUHAMMAD ZULHILMI BIN MD SALAHAN

Staff Quality Engineer • QA Automation • AI Testing & Data Quality

Kuala Lumpur, Malaysia • +60 19-706 6093 • muhammadzulhilmi2493@gmail.com

• <https://zulhilmisalahan.github.io> • linkedin.com/in/muhammadzulhilmi

PROFESSIONAL SUMMARY

Staff Quality Engineer with 10+ years across QA automation, data/ETL testing, and platform engineering. Experience leading test automation strategy, building KPI dashboards (eazyBI), and operationalizing data quality checks. Hands-on with Cypress, Robot Framework, Appium, Selenium, Python, CI/CD, and Azure. ISTQB-certified (CTFL, CTAL) and ISTQB Certified Tester in AI Testing (2026). Passionate about applying AI tooling to increase test coverage and delivery speed.

CORE SKILLS

Automation

- **UI:** Cypress; Playwright; Robot Framework; Selenium; Appium; SpecFlow; HP UFT;
- **API:** pytest; Postman; REST API;
- **DATA/ETL:** pytest; DBT Test; Great Expectations; Dagster; Data Quality; Snowflake;

Languages: Python; Java; C#; TypeScript; JavaScript; SQL;

DevOps / CICD: Jenkins; GitHub Action; Spinnaker; Azure DevOps; Git (SourceTree)

AI & Productivity: AI MCP; Mabl; Cursor AI; GitHub Copilot, LangWatch

CERTIFICATIONS

- ISTQB Certified Tester in AI Testing (2026)
- CTAL – Agile Tester (2022)
- CTAL – Technical Test Analyst (2022)
- CTAL – Test Automation Engineer (2022)
- CTFL – Agile Tester (2022)
- ISTQB – Certified Tester Foundation Level (2014)
- CPRE – Certified Professional for Requirements Engineering (2015)
- Huawei Certified Network Associate (HCNA) (2013)

PROFESSIONAL EXPERIENCE

Staff Quality Engineer — Omnicom

Petaling Jaya, Selangor | July 2025 – Present

- Led strategic quality engineering transformation by integrating AI, automation, and data-driven practices to improve efficiency, scalability, and product quality.
- Recruited and built high-performing QE teams by interviewing and hiring top talent aligned with project and organizational needs.
- Established global QA performance frameworks by developing KPI dashboards in EazyBI, enabling standardized metrics tracking and executive-level visibility.
- Partnered with senior leadership to drive process improvements through governance, metrics analysis, and structured documentation.
- Designed and implemented a Python-based data automation framework to proactively monitor six critical data quality metrics.
- Delivered near real-time QA insights to stakeholders by automating test execution reporting and enhancing transparency in quality status.
- Mentored and upskilled team members in technical, automation, and AI capabilities, fostering a culture of continuous improvement and innovation.
- Acted as Subject Matter Expert (SME) for Quality Automation, providing strategic guidance across teams and projects.
- Spearheaded development of AI-based MCP tools to assist engineers in test creation and identifying gaps in test coverage.
Evaluated and implemented emerging AI tools (e.g., Mabl, MCP, Cursor, GitHub Copilot) to enhance testing effectiveness and accelerate delivery cycles.

Senior Quality Engineer — Kinesso Malaysia Sdn Bhd

Petaling Jaya, Selangor | Jan 2020 – Mar 2025

- Spearheaded the implementation and standardization of a Cypress automation framework for front-end testing across multiple products; recognized as SME for API and front-end automation.
- Researched, designed, and developed scalable frameworks for ETL testing and data validation to ensure data accuracy and reliability.
- Developed and maintained robust automation test suites for the Learning Portal, improving regression coverage and release confidence.
- Architected and managed comprehensive FE, API, and ETL test suites for Audience Hub, ensuring end-to-end quality validation.
- Established and optimized CI/CD pipelines for automated testing in Audience Hub; led migration from Jenkins to Spinnaker, significantly improving execution efficiency and throughput.
Led and coached a small QA team, driving technical excellence, strengthening automation capabilities, and fostering continuous skill development.

Technical QA Engineer — Sitecore

Kuala Lumpur / May 2018 – Jan 2020

- Built and maintained BDD automation for Managed Cloud Billing application (Azure).
- Supported CloudOps; authored migration runbook and led xDB migrations per release.
- Optimized automation to run in parallel, reducing CI/CD execution time.
- Developed PowerShell automation to lower Azure cloud usage billing.

Automation Test Engineer — INDRA Malaysia

Bangsar, Kuala Lumpur / Aug 2017 – May 2018

- Converted manual test cases to Robot Framework automation for AirAsia.
- Maintained and optimized AirAsia DDT automation tool to improve stability and speed.

Software Quality Engineer (Level 2) — Quintiq Sdn Bhd

Petaling Jaya, Selangor / Oct 2015 – Aug 2017

- Executed full SDLC testing: requirements analysis, risk assessment, test design, automation, integration, regression, and release.
- Drove issue verification to ensure fixes without introducing integration/regression defects.
- Led end-to-end software benchmarking for non-functional testing (Benchmark Team).
- Owned API testing for Quintiq API library; ensured CI commits did not introduce integration/regression issues.
- Created and maintained unit tests using Quintiq Unit Test Framework (white-box).
- Tested Quintiq Mobile Client (QMC) and executed manual/automation testing across releases.
- Built mobile automation environment with Appium + Selenium Grid for parallel device/browser runs; developed PyTest scripts.

Software Quality Engineer Intern — Quintiq Sdn Bhd

Petaling Jaya, Selangor / Jan 2014 – Sept 2014

- Converted manual test cases to automation using HP UFT and Quality Center (QC).

Assistant Trainer / Facilitator (Freelance) — StartupMalaysia.org

Kuala Lumpur / 2013 – 2015

- Facilitated coding workshops (LiveCode, web fundamentals) for primary & secondary students.

- Supported events including CodeAsean 2015, HapSeng Group DCode 2015, StartupTeens 2014, DCODE 2013.

Mobile App / Web Developer (Freelance) — Self-employed

Malaysia (Remote) | 2014 – Present

- Developed mobile apps using PhoneGap and websites for personal, business, and events.
- Assisted clients with server deployments and ongoing site maintenance.

EDUCATION

Universiti Teknologi PETRONAS — Perak, Malaysia

Bachelor of Information & Communication Technology (Software Engineering major; Minor in Financial Management)
